

29th June 2021

Dear Sirs,

RE: AURORA - HOUSERS INVESTMENT UPDATE

We hope that all our fellow investors are safe and well. We would like to provide a brief update on status of progress for the projects to date.

- Villa 1 is currently reaching the 35% completion mark and being built at full speed.
- The retaining large walls to hold the land around the cliff took some time to do but is now complete.
- We intend for this villa to enter the decorations stage by Q1 2022 at the current speed.
- We have partnered with an influencer who is one of the biggest in Portugal in order to promote the sale of properties as they start to come to completion.
- We have secured one client who is set to purchase one of our villas next month. One client from USA is scheduling to travel and a third client from Denmark is certain to purchase on completion of construction.
- I as a shareholder have invested another 500,000 EUR into the projects to push ahead with the construction of the other 2 villas in order to ensure all properties are completed at the same time given the level of interest we are now seeing from clients.
- Prometheus is indebted for the faith, support and investment provided to it by its founding investors when we started this journey.
- An agreed sale to a buyer for the houses coming to completion will lead to an early or on time repayment.
- All interests will be paid till the end of financing.
- You can follow the evolution of the project on our website:
http://www.prometheus.international/aurora_about.php

As always, the Prometheus team is grateful for your support, patience and backing in our ventures. Stay safe and we look forward to closing this cycle shortly.

Yours sincerely,

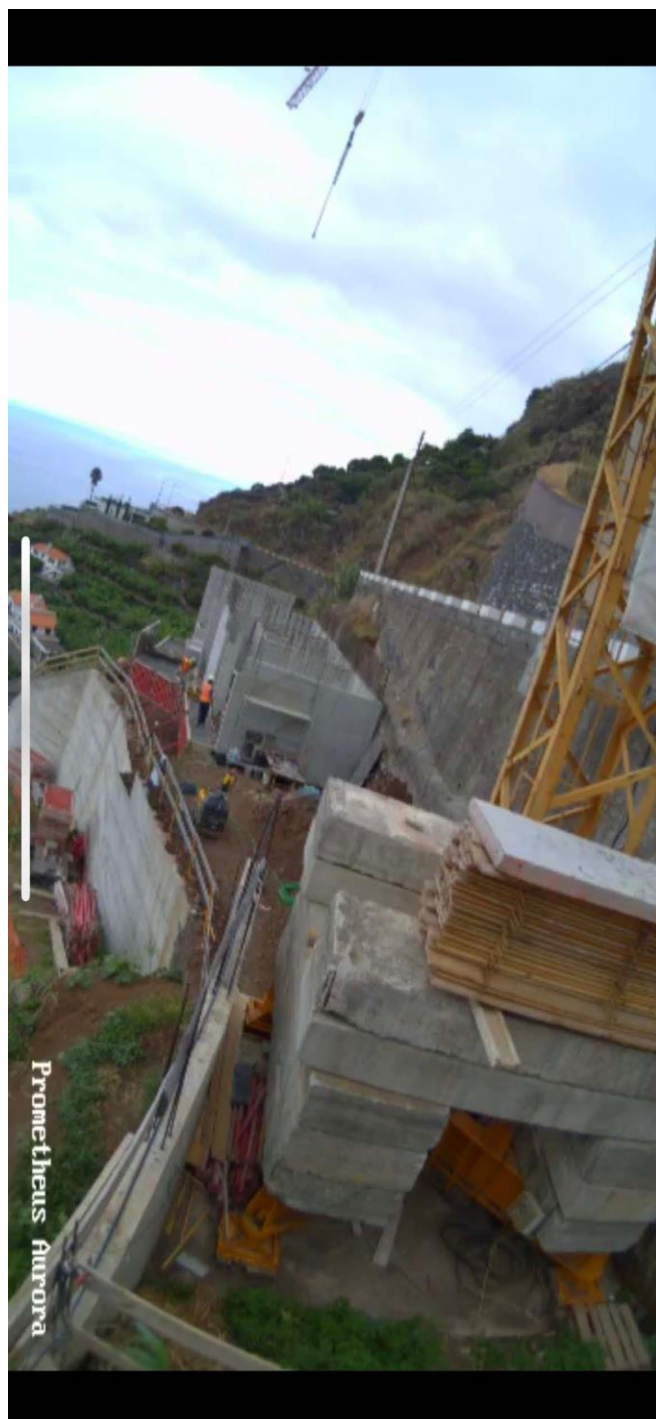

Priyesh Patel,
Chief Executional Officer
